Naples, March 8th 2023

to Directors of Departments of Philosophy, Physics, Mathematics, Natural Sciences

Dear Director, I renew you my invitation to spread again the announcement of the third edition of the Tonielli award, as in the attached file, among those who are engaged in research work at the Institute that you direct.

I remind you briefly that the Tonielli and Ruberti family, in collaboration with University of Cologne and our Institute, have dedicated an award to the memory of Federico Tonielli, to enable scientific support of a talented PhD student (who still has to complete the research iter). It consists of two grants of 1500 EUR each.

The last two editions were attended by numerous young researchers; almost thirty projects participated in the last edition.

The family and our Institute assign their award to a young PhD Italian researcher (whose research is ongoing) chosen by a Scientific Panel among those who presented her/his PhD work in one of the following fields: Mathematics, History or Philosophy of Physics or of other Sciences.

The University of Cologne assigns its award to a young PhD researcher (whose research is ongoing also) from the Faculty of Mathematical and Natural Sciences, chosen by another Scientific Panel among those who presented her/his PhD work.

The two awards will be assigned in a joint hybrid ceremony to be held in May 26th 2023.

Applications and supporting material, as the announcement indicates, should be sent in a pdf format via email to Istituto di Scienze Umane ed Esistenziali: info@isue.it or gbuffardi@isue.it.

Applications received until April 16th 2023 will be considered. Thank you very much for your support.

Best regards

Gianfranco Buffardi
president ISUE
