(Aula Dini)

Gian Francesco Giudice
CERN, Geneva, Switzerland

Terrà un seminario dal titolo:

“The Physics of the CERN Large Hadron Collider”

Abstract:

The Large Hadron Collider is one of the most ambitious projects ever brought to completion. In the Colloquium I shall describe briefly its structure, providing some details both on the accelerator proper and on the particle detectors, but spending some time also on the role of large-scale projects in Science today. I shall discuss the scientific motivations for the Large Hadron Collider, describing some key questions that are expected to receive an answer from the ongoing experiments.

Tutti gli interessati sono invitati a partecipare.
