

Seminar Series on Quantum Computing

Rydberg qubits for simulation and sensing

Oliver Morsch
(CNR-INO and University of Pisa)

Abstract:

In recent years, Rydberg atoms have been increasingly used in several quantum technologies. In this talk I will give a brief introduction to Rydberg qubits and their applications in quantum simulation and quantum sensing. I will then give some examples of our recent work on these two technologies: the simulation of open quantum systems (phase transitions in driven quantum systems with controlled dissipation) and spatially resolved temperature measurements in a cold atomic gas using Rydberg-Doppler broadening thermometry.

Venue: Seminar room of Math department (1st floor on the left)
Time: Monday, 20/05/2024, 17:00

Piano Nazionale di Ripresa e Resilienza (PNRR)
MISSIONE 4 COMPONENTE 2, INVESTIMENTO N. 1.4
Centro Nazionale 1 on HPC, Big Data and Quantum Computing
(Simulazioni, calcolo e analisi dei dati ad alte prestazioni)
SPOKE 10 (Quantum computing) Università di Pisa
